

GAMBIAN TECH

Startup Directory

➤ YOUTH
EMPOWERMENT
PROJECT

Foreword by The Ministry of Trade, Industry, Regional Integration and Employment

The Gambian economy is flourishing, open for business and integrated in the global market place. Trade in services are of particular relevance to The Gambia and so is innovation.

The 21st century is digital and the information technology and communications sector is key to integrate the global economy, especially for developing countries. In this context, the Government of The Gambia is committed to supporting innovators and to providing a conducive environment for digital businesses to grow. We believe that the digital economy has the potential to generate employment and to create pioneering solutions shaped to The Gambian reality and context. More importantly, the business environment reforms that we are implementing are founded on the principle of 'Digitalization' of all processes and procedures to ensure efficiency and transparency.

The present Tech Startup directory aims at facilitating the identification of the most-promising tech startups in The Gambia accompanied by the YEP Tech Startup Support programme. We deem it as in line with the National Development Plan. The Critical Enabler number five of the NDP aims at making The Gambia a Digital Nation and at creating a modern information society.

The Tech startup directory will undoubtedly contribute, by the value of its content and its wide distribution, to promote The Gambian digital entrepreneurs in both African and international markets by connecting them to investors, partners, and buyers.

Lamin Jobe
Hon. Minister of Trade

Foreword by The Information Technology Association of The Gambia

The Information Technology Association of The Gambia (ITAG) consists of professionals and institutions within the ICT ecosystem whose aim is to promote the growth, development and use of ICT through collaboration and partnership with relevant stakeholders, by providing a platform to ensure advocacy and accessibility of ICT services for the socio-economic development of The Gambia.

ITAG's has recently partnered with the International Trade Center in revitalizing and revamping the association after a 4 year hiatus. ITAG has since engaged its community in numerous activities in

- ✔ Supporting government's efforts in review the ICT Training standards in The Gambia
- ✔ Supporting IT institutions in developing market export strategies and exploring regional markets
- ✔ Building Awareness and community involvement in developing ICT Service portfolios
- ✔ Providing Training

Of recent, our involvement in the YEP Tech Startup Support Programme is giving 27 Tech Startups the background knowledge to develop through the different stages of maturity in the startup space.

We are pleased to partner in this venture and believe that it is in line with our vision of setting and maintaining a vibrant Tech ecosystem in The Gambia.

Seedy Bensouda
President, ITAG

Foreword by The Youth Empowerment Project

I am pleased to share with you The Gambian Tech Startup Directory, which showcases the profiles of the twenty-four startups we are supporting under the YEP Tech Startup Support programme. The startups relying on technology as a core enabling factor were shortlisted upon a call for application launched early January 2019. The call for application was followed by a two-step selection process involving both a theoretical scoring and individual face-to-face interviews.

The selected startups benefit from a range of services including training, coaching, market linkages and promotion. The objective of the programme is to help the tech startups on their business journey and to position The Gambia in the global tech ecosystem. The Directory brings together young Gambian tech entrepreneurs and presents their startups to a global audience of partners, investors and clients.

The programme falls under the IT sector & digital entrepreneurship component of The Gambia Youth Empowerment Project (YEP). YEP is an initiative of the Government of The Gambia implemented by the International Trade Centre and funded by the EU Emergency Trust Fund for Africa. The project equips youth with job-ready skills and entrepreneurship opportunities in a variety of sectors, ranging from agribusiness and construction to tourism and tech. The goal is to empower young people to earn higher, stable incomes and create quality jobs. The IT sector & digital entrepreneurship component helps tech entrepreneurs to take advantage of the digital economy and turn them into economic benefits.

Raimund Moser
ITC Representative in The Gambia

YEP Tech Startup Support Programme at a glance

The one-year YEP Tech Startup Support programme is part of the YEP Gambia project, funded by the European Union, and implemented in cooperation with ITAG, The Gambian IT association. Twenty-four Gambian tech startups applied to the programme in January 2019 and were selected further to a review of their application and one-to-one meetings. The startups have been segmented into three categories according to their level of maturity:

- 13 in the Ideation category: founders are engaged in product or service ideation, market research, prototyping of a Minimum Viable Product (MVP)
- 8 in the Entrepreneurship category: MVP confirmed, no or little revenues
- 6 in the Growth category: the startup generates revenues, and founder look into product and/or market diversification

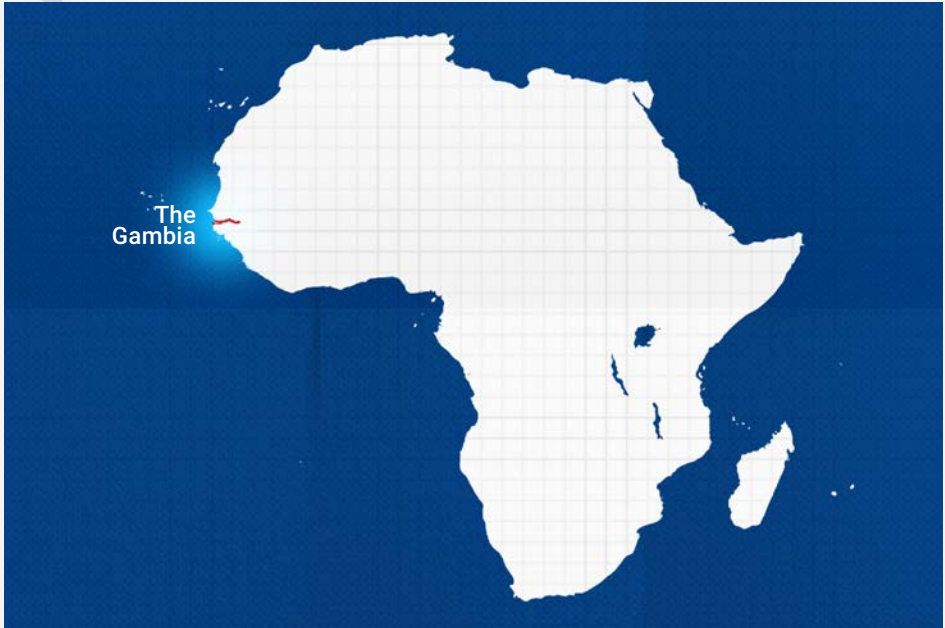

Early-stage tech startups (Ideation/ Entrepreneurship) receive a blend of online and onsite training and targeted coaching on different topics related to building and further developing their startup, product/ service. This also includes thematic trainings and coaching such as e-commerce and digital payments

More advanced startups (Growth) have access to opportunities in the form of local/regional/international start-up events and competitions, to develop their business, and connect them with global markets and potential investors

All the startups benefit from an online and offline visibility, including the present directory, PR & Communications support.

 **Country:** The Gambia

 **Language:** English

 **Capital:** Banjul

 **Time zone:** UTC+0 (GMT)

A Booming Tech Sector

The Gambian Tech sector has undergone expansion and evolution through liberalization and privatization policies led by the government. It has grown profoundly in the past years with the African Coast to Europe (ACE) cable system put in service in 2012, which facilitates internet access for Gambians.

The Gambia is well-positioned in terms of infrastructure, mobile network coverage and mobile penetration, despite remaining access challenges in rural areas. The new Gambian government prioritizes ICT in its new Development Plan to emphasize growing the sector, which will lead to positive spill over effects across the economy. At the same time, challenges remain in the areas of skills related to technology, intellectual property rights management and enforcement, IT-specific certifications and access to finance.

All conditions for a mobile value-added service innovation revolution are present in this vibrant Tech ecosystem, especially as about 88% of the enterprises' workforce are youth (age 35 or less), and more than half is led by youth. The YEP Tech supported startups illustrate these trends: 82% of the startup founders are less than 35.

Areas of specialization of the YEP Tech Startups

Financials USD

Revenues : 1,000,000/600,000/150,000

Expenses : 800,000/565,000/153,000

Problem / Opportunity

Have you ever struggled to find an apartment or know someone who has tried to? How about a mobile app that could show a listing of apartments for rent or properties for sale?

Solution / Product

Deka is a mobile app for iPhone and Android allowing you to find your dream home without a hassle. It bridges the gap between the consumers and realtors or anyone with a property to rent or sell.

Business Model

Deka charges a very competitive commission of 4.9% per successful transaction.

Competitive Advantage

A centralised platform that real estate agencies can post their listings as opposed to individual websites of real estates agencies. Our current data and traction already puts us at an advantage against competition.

Traction

From Nov, 2017 to date, we have 353 conversions. We focus exclusively on the technology, growth and user-acquisition.

Lebalma

Management Team

CEO: Modou NS Njie

CMO: Fatoumata Jallow

CTO: Ebrima LK Njie

Financials USD

Revenues : 17000

Expenses : 2000

Problem / Opportunity

Agropreneurs need investments to capitalize on these opportunities and investors on the other hand want to benefit and be part of the gains on generated from the opportunities. Our platform solves this problem.

Solution / Product

MoneyFarm serves the need of investors and agropreneurs by being the platform that connects the two together. Our educational programs serves to fill the huge information gap between entrepreneurs and investors.

Business Model

We expect to gain 10% of each investment made through our platform as well as revenues from educational materials sold online and offline.

Competitive Advantage

We offer a higher rate of return on investments between 6 % and up to 30% which traditional lenders cannot offer. Barriers to entry can be government policies and lack of awareness which we are already working on.

Traction

We have already launched and so far onboarded 4 investors and 4 agropreneurs and raised \$17000 in investments within the past 4 months of operating. We hope to raise \$100,000 within the next 6 months. Seedstars Banjul winner.

Ryde Africa is developed for the African Market to provide a secure, reliable and easy ride for everyone

Use of Funds

Product development : 30%

Marketing/sales : 10%

Operations/inventory : 50%

Legal/other : 10%

Management Team

CEO and CTO : Ebou Lawrence Mendy

CMO: Catherine Bahoum

Problem / Opportunity

Some passengers get robbed by local taxi drivers. In The Gambia tourism covers more than 20% of our GDP. Most of them, encounter bad experience with local taxi drivers like robbery and overcharging of fares

Solution / Product

Taxi App: Passenger with smartphone can download the app and request the nearest available Taxi.

Dispatcher Service: Customer without a smartphone can call or send a text to the Call Center and a driver is assigned to them

Business Model

In The Gambia we are charging 9% commission on every completed ride. In Ghana we take 25% of the revenue and the partner takes 75% and is responsible for all the expenses incurred (except hosting) to operate Ryde Africa.

Competitive Advantage

Uber charges 25% commission on drivers. Taxify charges 10 – 15% commission on drivers . We charge 9% commission and lowest fare for passengers. The platform also has both taxi and motorbike options.

Traction

In The Gambia we have 308 active customers with more than 500 completed rides. We've launched in Accra and driver registration is on. Ryde is also the Seedstars Banjul Competition 1st Runner-up.

Pitch

To be a leading market provider for agricultural goods in The Gambia, ensuring that farmers easily sell their products, buyers pay less for quality goods while returning value for investment to our partner.

Financial Information (USD)

Initial capital: 7,000

Cash spent per month: 1,000

Investment required: 50,000

Percentage of shares that could be made available to an equity investor: 20%

Use of Funds

Product development : 35%

Marketing/sales : 30%

Operations/inventory : 20%

Legal/other : 15%

Management Team

CEO: Ebrima S Dem

CMO: Fatou Jobe

Sales manager: Kaddy jarju

CTO: David Edgar

Financials USD

Revenues : 1000 monthly

Expenses : 1200 monthly

Problem / Opportunity

Despite that over 75% of Gambians are farmers; access to market is a fundamental challenge. This is caused by disconnectedness between farmers and buyers.

Solution / Product

An online and mobile app platform that connects farmers to farmers, allows farmers to buyers to interact, share vital information and ensure easy purchasing and supplying of agricultural commodities in real-time.

Business Model

We added percentage commission on the price of product and transport cost. We expect to make a turnover of \$US 1,200,000 annually, working with 1000 farmers and generating commission of \$US 100 per farmer per month.

Competitive Advantage

Entire process from purchase to delivery is straightforward and transparent, Tesitoo products enjoy greater visibility and our products are 20% less expensive than those sold in physical markets.

Traction

We have signed contract agreements with over 100 farmers including farmers network such as AFET. We have 5 supermarkets that have agreed to purchase local agricultural products through the Tesitoo platform.

Pitch

Obtaining data on companies, organizations and services can be very tedious in The Gambia because information on the search engines does not provide answers to the local needs.

Financial Information (USD)

Initial capital: 9,000

Cash spent per month: 2,000

Investment required: 21,000

Percentage of shares that could be made available to an equity investor: 35%

Problem / Opportunity

Data finding is an obstacle with regards to products and services a business offer. Our platform uses technology to bridge the gap between businesses and customers.

Solution / Product

- ✓ Directory Services
- ✓ Mobile Client App (Android, iOS)
- ✓ Realt-time interactive chat
- ✓ Third party integration
- ✓ Buying and Selling online

Business Model

- ✓ Subscription
- ✓ Advertisement
- ✓ Per product sale: 10%
- ✓ Integrated with GSM: Electronic Voucher
- ✓ Integrated with NAWEC: Cash Power
- ✓ Money Transfer: 10% per transaction

Competitive Advantage

Flexibility for customers to contact business and using navigation mapping system. Simply to use and user friendly app and possibility for online shopping. Timely delivery of business's products and services

Traction

The traction from 2019 to 2021 would be an expansion to other West African countries like Senegal, Guinea Bissau and Guinea

Problem / Opportunity

The distribution of Float is a problem because we don't have enough float to cater for all our customers. With more funding, we can purchase more float and distribute to all our customers on a daily basis.

Solution / Product

Positioning 5 kiosks on strategic locations and extend our network in the northern part of the country and Upper river division will help people in these areas to be able to send and receive money for their loved ones.

Competitive Advantage

We have the highest subscriber base and have a weekly radio programs were we engaged on consumer education.

Traction

With a better network, our profit margin will increase and user base will increase as well.

Pitch

ThinkMobile money is a mobile phone payment system that can be use to send and receive money, pay bills, do shopping, buy cash power, pay salaries, sell airtime and a lot more

Makers of business intelligence and development tools that efficiently save businesses time, money and enhance operational capacities through software products.

LEUCOCYTES

Year of establishment: 2019

Field: Health-tech

Solution / product

A multi-tenant application in which there is a central admin and multiple hospitals (tenants) with their own database. Each hospital will get its own domain thereby separating it from other hospitals. Through this program, the patients registered in a particular hospital can visit other hospitals and their doctor can see their past medical records and make a new one which will be stored in the system to be seen by a future doctor.

MEDPROGNOSIS

Year of establishment: 2019

Field: Health-tech

Solution / product

MedPrognosis is an AI (artificial intelligence) software solution that seeks to automate in real time the process of diagnosing a patient suffering from a particular disease through chest x-ray CT scans. It does so by employing high level deep learning algorithms to predict the probable disease a patient is suffering from.

EMR Squad

Year of establishment: 2019

Field: Health-tech

Solution / product

A hospital management portal that can manage all aspects of hospital operations and management from doctor's appointments to patient's visits and from medical history to hospital inventory management. It is a comprehensive hospital management system that covers all the day to day operations of a hospital and delivers seamless digital experiences for patients, hospital administrators and employees.

This project is funded by
the European Union
